Base:

- Industrial steel
- Black

ALBERT LIVE EDGE DINING TABLE SQUARE BASE

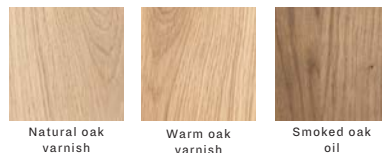

About

The solid oak table top combined with the robust steel frame turn the Albert dining table with square base into a real statement piece. The black square base is made of powder coated steel, the industrial steel square base has a raw steel look.

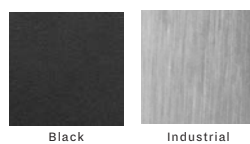

Materials & care

- Solid oak table top (available in 1 piece or 2 pieces) with live edge (natural undulate edge). Black powder coated steel base or industrial raw steel base.
- Felt glides
- Finished with a high performance, water-based, polyurethane lacquer (Natural oak varnish & Warm oak varnish) or pigmented oil (Smoked oak oil).
- **Varnished table:** clean regularly with a mild solution of water and natural soap or protect cleaner for varnished furniture. Do not sand varnished furniture; this will damage the protective layer and will affect the water and dirt resistance of your furniture.
- **Oiled table:** remove any spillings immediately with a mild solution of water and natural, non-aggressive soap. Make sure your towel is not too wet. Treat it periodically with a liquid wax cleaner and a maintenance oil.
