Base:

- Black

About

The round Albert dining table allows you to have conversations with all of your table members at the same time and is perfect for uneven numbers as well.

Materials & care

- Solid oak table top with slanted edge and black powder coated steel base.
- Felt glides
- Finished with a high performance, water-based, polyurethane lacquer (Natural oak varnish & Warm oak varnish) or pigmented oil (Smoked oak oil).
- **Varnished table:** clean regularly with a mild solution of water and natural soap or protect cleaner for varnished furniture. Do not sand varnished furniture; this will damage the protective layer and will affect the water and dirt resistance of your furniture.
- **Oiled table:** remove any spillings immediately with a mild solution of water and natural, non-aggressive soap. Make sure your towel is not too wet. Treat it periodically with a liquid wax cleaner and a maintenance oil.
