## OLD WORLD TRADITIONS WITH AN ACOUSTIC SOLUTION

Reducing the level of noise in our habitat is one of the biggest challenges we face today. Our room dividers and panels have the highest level of sound and noise absorption control. Beside being acoustic, our Wall Frames and Fame Frames give you the possibility to style, decorate and enhance your project, house, office or any space you wish to balance out with the freedom of designing and high comfort.

## GIVE & TAKE

For the GIVE & TAKE story we were inspired by the works of two masters; the old master Jan Davidsz de Heem, famous for his still-life paintings and the amazing bouquet that has been created by the famous Amsterdam flower master; Menno Kroon. The bouquet is offered with tattooed hands Give & Take. The finishing touch can be found in the hand-embroidered insects that are sewn on the traditionally woven panel.

## LES FEMMES DE DELFT

With ironic anachronisms and an eye-catching confrontation between highbrow culture and elements of contemporary pop culture, our collection les femmes de delft takes Flemish Tapestry to new heights. We once again combine weaving and embroidery in striking panels. The beautiful background is the original cityscape of Delft painted by Johannes Vermeer, the Dutch Baroque painter, also know for painting Girl with the pearl earring. The tattoo on her back is inspired by an original porcelain vase motive. The beautiful background is the cityscape of Delft painted by Johanees Vermeer, the tattoo on her back is inspired by an orignal porcelain vaise motif.

## EXOTIC ZARU

The Zaru collection by Meisterwerke shows a warm, exotic, lush and leafy landscape with a sensual lady in the middle dressed in a classic authentic cloak made from old tapestry. The scene makes you dream about distant travels and exuberant nature. An unmistakable reference to the magical and exotic scenes with rhinos, lions, leopards, peacocks, unicorns and decorative foliage on medieval tapestries.

ZARU is the Japanese translation for monkey. 3 different detailed embroidered monkeys hide in the background of this beautiful Asian jungle landscape.

## THE HISTORIANS

Our inspiration comes from the historical portraits of noble men and noble ladies of the Middle Ages, giving them a decorative but contemporary sleeve tattoo. Their Mona Lisa smile projects an image of the indefinable tensions between the past and the present. It is as though you are drawn into the presence of an imaginary construct that cannot possibly be real.
